

To phase splitter
Blackface fender style.
(V3 = 12AT7)

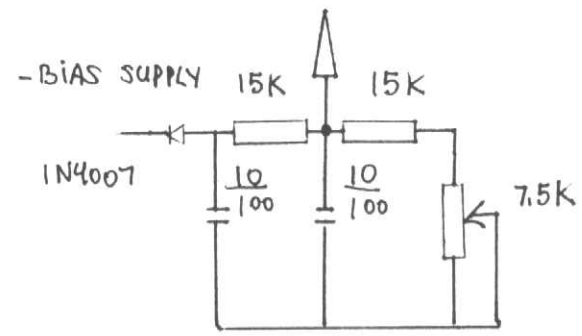

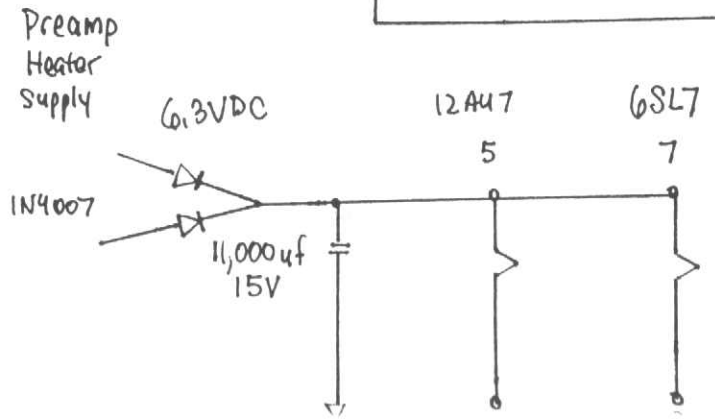

Notes for Houndog Redbone

- V1 - 6SL7
- V2 - 12AU7
- V3 - 12AT7
- V4 & 5 - EL34 (ULTRALINEAR OUTPUT TRANSFORMER)
- 18 GA SOLID WIRE
- SHORT OR NO LEADS WHERE POSSIBLE IN SIGNAL PATH.

My opinions:

- ADD 220K 1WATT Bleeder resistors in PARALLEL WITH INPUT FILTER CAPS
- not real impressed w/ tone of ultralinear transformer. standard Fender, Marshall type would improve.

HAUND DOG REDBONE.
